

Meeting Notes

Feng Shui Working Group

Sunday January 31, 2010

Check-in round

General Notes:

Roshi to update Feng Shui Project Report which will become part of an overall master plan.

Overall center policies in progress: members adding items to grounds, storage, animals.

Review of Report

- Pine House - Work basically done
- Zendo - Group remodel of front gaitan as one large project.
- Buddha Hall - Include emergency exit tour as part of guest orientation. Roshi to inform Yudo. Review idea of moving archive above Founder's room. If moved, add door or blocking to bottom of stairs.
- Courtyard - Reconsider officiant's path. Proposed compost/garden supply area needs to be designed so that whole courtyard is available when needed.
- Nilotpala - Add landing at stair to center. Review stairs to 2nd floor. Black Pine is favored as tree for pool garden. Lynda to coordinate observance of Kanzeon statue and clearing of area with residents.
- Pundarika - Create shrine / altar area, fountain.
- Sangha House - Plum Hermit to paint stair rail during next visit.
- Kanzeon Garden - Add to report, clean and clear, level walkways.
- Jizo Garen - Look into fence panels to block view of parked cars and form backdrop for pine.

Buddha Hall Prep Room

Design has been updated.

Yoshin not available to do the work but he recommended Closet World for utility areas to build and install.

Next step is to recommend the project (with ballpark cost estimate) to the EC. They will determine priorities.

Closet under stairs was not recommended (by Yoshin) so storage space for cleaning supplies will still need to be found.

Check-out round

This is the working groups last meeting.
